

Updating your Contact Information

Last Updated: May 1, 2019

Need to add, change or remove your existing contact information? You can do this in the Student Information System ([SIS](#)) by following these steps:

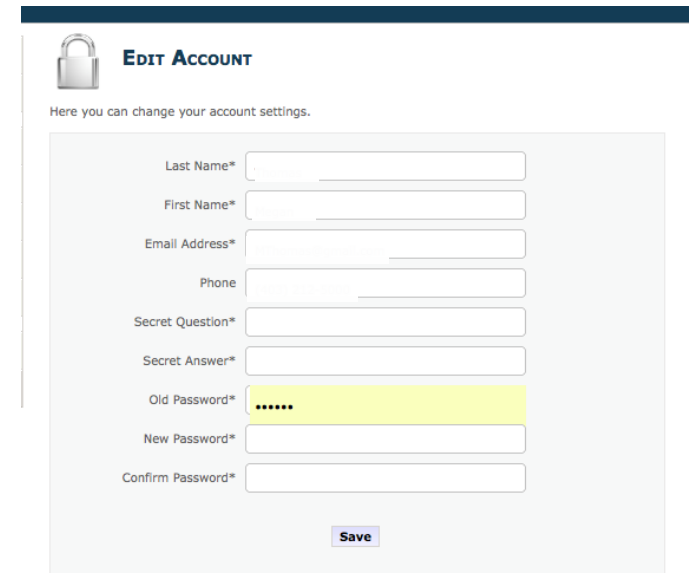

To Reset your Password

1. From the main menu, select the **Edit Account** option.

2. Make your changes to the appropriate fields and click **Save**. Your changes will be applied to your next login.

Note: The **Delete** and **Backspace** button do not work in the **Phone** field. If you need to make changes to this field, simply type over the existing text, and the system will make the changes for you.

EDIT ACCOUNT

Here you can change your account settings.
